

Keep safe

- Set up the branch supply stop valve correctly to keep the system at full capacity. Once in place, explain fully how to use the product to your customer.
- The user is also supposed to carefully read this booklet and keep it in a safe place.

Branch Supply Stop Valve

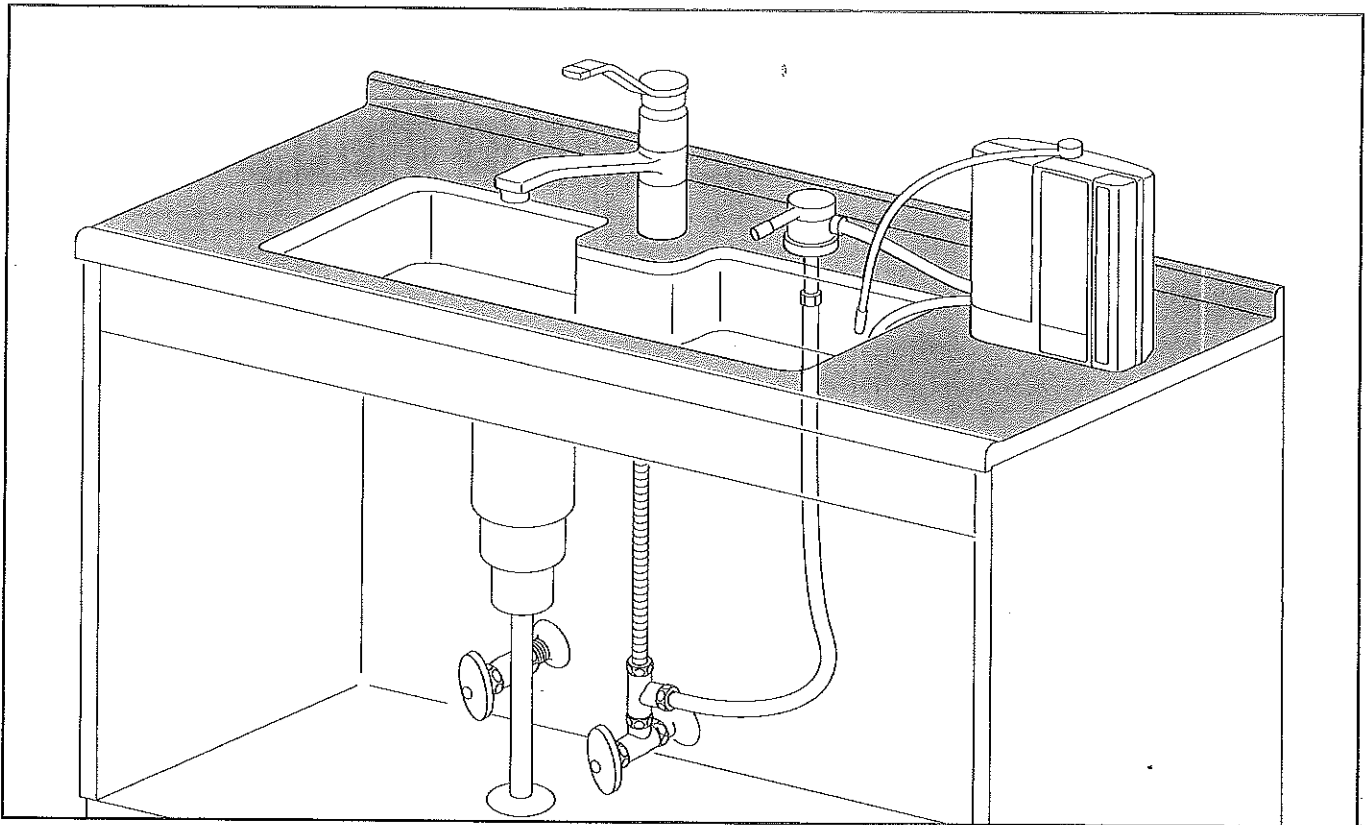

Setup Instructions

Request to the installer

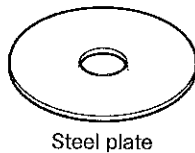

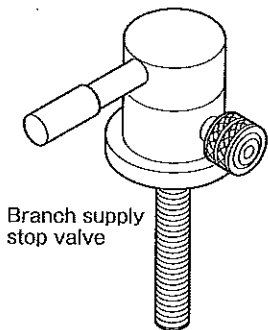

Be sure to hand over this manual to the user.

Final Setup View

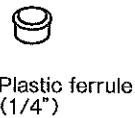

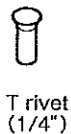

Checking the component parts

Make sure the following parts are all included.

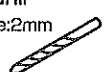

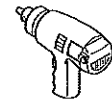

Included but not employed

Tools required for the setup job

Powered drill

drill
Size: 2mm

Hole saw
Size: ϕ 13mm

(if a controller is to be installed on the wall.)

Use the drill for drilling a hole in the work top, or hole for passing pipes and cords.

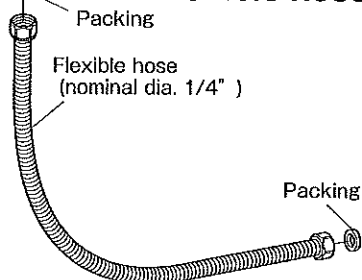

Pipe wrench or monkey wrench

Basin wrench

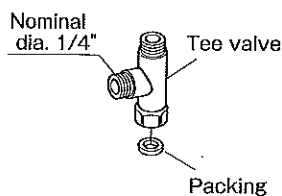

Optional parts

Flexible hose

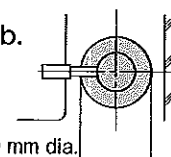

Tee valve

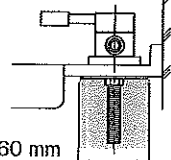

Choose a spot large enough for the setup job.

Required space: 60 mm dia.

Required space: 60 mm

Safety Precautions on Setup Job

- Before the setup job, carefully read the "Safety Precautions on Setup Job" to install the branch supply stop valve correctly.
- The [! CAUTION] in this manual indicates potentially serious hazards (injuries and property damages) depending on situations. Every instruction covers important contents on safety. Be sure to observe all the instructions.
- With the unit in place, make sure the system functions well. Then explain to the user how to use the unit.
- Request the user to keep the setup and operating manuals in an accessible spot.
- The pictograms are classified as follows to indicate what to keep in mind.

	Used to indicate what to prohibit.
	Used to indicate what to enforce.
	Used to indicate what not to disassemble.

CAUTION	
	● Avoid a freezing spot to set up the product. * Water leak may happen.
	● With the unit in place, make sure there is no water leak at the tee valve, flexible hose and supply stop valve. * Household goods or other properties may get damaged.
	● Never tamper with nor disassemble this product. * A trouble, damage or water leak may happen.
	● Do not open the supply stop valve until the hoses get connected to the unit.
	● Be sure to use the specific tools for making the hole. * If the specific tools are not used or if a hole cannot be made in the countertop, the countertop may get damaged. Be sure to contact the kitchen systems manufacturer before starting this job.
	● If a water purifier or the like is used, be sure to connect the branch supply stop valve to the water supply system. * Otherwise the unit may get in trouble.
	● You may get your hand injured. Be very careful in setting up this unit.

	● Check the connections and piping (hose connections) at regular intervals to check for water leak. * Even if a connection gets loose or a part gets degraded, a water leak may be left undiscovered. In such cases, household goods or other properties may get damaged.
